revolabs FLX™

UC 1500

Enterprise VoIP and Softphone Conferencing, Extended

Larger conference rooms in the enterprise require additional microphones at the ends of the table to ensure quality call performance. Current solutions for this scenario involve connecting multiple units for additional speaker output and microphone input, which increases the overall system footprint for a minor improvement in audio quality.

The Revolabs FLX™ UC 1500 provides the answer for the larger conference room by building off the speakerphone capability of the FLX UC 1000 IP & USB Conference phone with two additional directional microphones.

The UC 1500's integrated SIP technology works in all major telephony environments, whether on premise or in the cloud, and supports all market-leading IP PBX's. In addition, the FLX UC 1500 easily integrates with your choice of 3rd party PC applications for collaboration and conferencing. A key benefit of this integration is that the FLX UC 1500 is capable of bridging VoIP Calls and calls via 3rd party softphone applications – allowing your team to communicate using the best medium for collaboration.

The FLX UC 1500 offers the most extensible solution for USB, VoIP, and Conference Bridging for Enterprise Conferencing and Collaboration.

FILLS THE CONFERENCE ROOM WITH HIGH QUALITY SPEAKER SOUND
In conference rooms sized for up to 18 people, speaker audio can be heard by every meeting participant; the FLX UC 1500's powerful speaker can fill the entire conference room with audio.

COMPLETE ROOM MICROPHONE COVERAGE
Every word by the meeting participants is picked up and transmitted to the far end due to the complete 360° coverage of the four built-in directional microphones and additional directional microphones.

FULL DUPLEX
Participants can communicate naturally as if they are in the same room, and the technology in the FLX UC 1500 supports simultaneous audio play back and audio capture ensuring every word is heard.
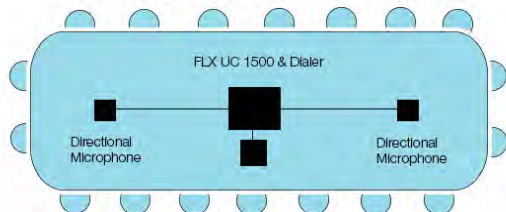

INTEGRATED ECHO CANCELLATION
The meeting participant speaking has his audio picked up and transmitted clearly; built-in digital signal processing separates out the speech of the meeting participant, room noise, and audio from the speaker of the device to ensure only the correct audio is transmitted to the far end. Real discussions between conference participants are finally possible.

INTUITIVE DIALER WITH FULL COLOR GRAPHICS DISPLAY
The keypad provides quick access to the key calling features: On-Hook, Off-Hook, Volume Up/Down, Mute, Redial, and Main Menu, with additional context-dependent soft keys, navigational buttons, and telephone keypad for ease of use and dialing. The intuitive dialer boasts an easy to use, icon-based menu system on the full color graphics display.
