

INZONE™

DOCUMENTHOLDER IV

SUN-FLEX
®

PRODUCT INFORMATION

The inline construction makes an ergonomic correct positioning of the actual documents between the keyboard and the screen.

By turning the plate around in 180 degrees, you can use the INZONE™ Document holder IV as an inline “drop down beneath the desk surface”-document holder, that fills the space from the bottom of your monitor to the top of your keyboard. This is to avoid tiring twists of the neck and should muscles when working with documentation.

The unique and appreciated ruler function with expanding possibilities makes work with many documents even easier. The ruler also has a magnifying function.

The construction is of heavy duty steel and painted with “matte” powder coating finish to avoid reflections.
