

PPA T46

PERSONAL PA® BODY-PACK TRANSMITTER

[CONVENIENT AND CUSTOMIZABLE HEARING ASSISTANCE]

NEW Lightweight and portable, the sleek PPA T46 FM transmitter broadcasts voice or audio programs on one of 17 available channels, 72-76 MHz. Listeners use PPA R35-8 / PPA R37 receivers or an R1600 speaker. The PPA T46 features a convenient, dual preset mode that allows users to set separate channel/volume/auxiliary gain levels for each preset and then toggle back and forth between them. The new OLED user interface on the PPA T46 is bright and flexible – offering an easy-to-read digital display

and active read-out. The unit also features flexible microphone and auxiliary inputs, push-button on/off/mute controls, settings lock and selectable compression.

The PPA T46 now replaces the PPA T36 transmitter in the Williams Sound Personal PA TGS PRO 737 and TGS PRO MULTI FM tour guide systems, and the FM ADA KIT 37 and FM ADA KIT 37 RCH compliance kits.

Note: The Personal PA® system is approved by the FCC for operation in U.S. markets. The Personal PA® cannot be used in all countries. Check with your government's radio regulations for 72 - 76 MHz operation.

PPA T46

PERSONAL PA® BODY-PACK TRANSMITTER
